			<i>RQ 500</i> 9	

## NOTES

- \* Provided a modern anti-explosive device is fitted.
- It is suggested that any safe weighing less than 10 cwt. should be securely anchored; if not the risk should be reduced.
- The suggested limits apply to areas in the United Kingdom with a high incidence of crime e.g. Greater London. An increase in the suggested limits for Provincial and Rural Areas could be considered, but the amount of increase depends on the circumstances of individual cases and insurance requirements.
- Except where mentioned, information relating to safes of other manufacturers and of Foreign manufacture can be supplied on application.
